6 February 1959

SUBJECT: Cancellation of Requirement for N Rack

TO: Contracting Officer

25X1A This is in confirmation of your telephone conversation on 30 January 1959 with [REDACTED]. The N rack which is presently on loan to your organization from Customer No. 3 may be retained permanently to fulfill an existing requirement for this equipment. Our using command headquarters was queried in regard to their current requirement for N racks, and it has been confirmed that the rack scheduled for delivery to the organization designated as OS-2 at Laughlin Air Force Base is no longer necessary.

25X1A This deletion will decrease the FOG requirement for N racks from five to four, three of which already have been delivered. [REDACTED] has informed us that we may expect our fourth and last rack about August 1st. As a requirement for this rack does not appear to be urgent at this time, please be advised that the rack presently in the possession of your organization may be retained.

25X1A The cost of the N rack as purchased under Contract No. A-101 is estimated at [REDACTED] including fee. Please credit this amount to Customer No. 3 and make the appropriate charge against Customer No. 1 instead.
